LinkedIn [@evansellers01](#) | GitHub [@SellersEvan](#)

Outgoing computer programmer with 7+ years of experience. Seeking a technical internship to help solve issues with technology and expand my knowledge of computing. Demonstrated the ability to bridge the communication barriers between stakeholders, customers, and developers.

Education

Bachelor of Science in Computer Science (GPA 3.66/4.0)

Rose-Hulman Institute of Technology | Terre Haute, IN | May 2025

Related Courses: Intro to Web Programming, Intro to Digital System, Data Structure & Algorithm Analysis, Intro to Systems Programming, Object-Oriented Software Development, Software Quality Assurance

Experience

Cisco 5G NSO

System Engineer Intern | Summer 2022

- Quickly develop and deploy solutions during system outages to help analyze situations and get services back online for customers.
- Develop tools for engineers to get critical information about Cisco's 5G infrastructure and analysis systems during outages.
- Gained insight into collaborating and code quality standards for the industry.

Cisco Enterprise Sales

Technical Sales Intern | Summer 2021

- Implemented Cisco APIs to create solution benefiting stakeholders, such as DNA Center Command Line Interface and doctor tracking using Meraki Access Points
- Created a Cisco WebEx Bot Builder Tool to help build bots easier for customers
- Gained insight from customers to make software and hardware design decisions

Projects

Political Company Analysis Web App

Web application to view the political analysis of company

- Designed Serverless APIs for React application to utilize for dynamic content
- Developed Python scripts to handle data collection through APIs
- Utilized abstract RESTful API Services to deal with Authentication and data

Object Detection System

Artificial Intelligence Program to detect Weapons and Masks

- Created scripts to handle mass image processing with OpenCV and TensorFlow
- Utilized NodeJS to create abstract RESTful API Services

Skills

- Developed full stack applications using the MERN stack and other tools
- Deployed full stack to cloud for production using Docker and Linux
- Designed and utilized RESTful API for production and development
- Created Python services to process data for API access
- Educated in NodeJS, Python, React, Java, HTML/CSS, C, and more

Certifications

Cisco Dev Net Associate Exam

2021 | v1.0 200-901

Understanding of software development, networking, API's, internet of things, and security

Activities

Rose-Hulman Swim Team

2020 – Present

- All American Academics (2021, 2022)
- Most Valuable Swimmer (2021, 2022)
- Newcomer of the Year (2021)
