

Evan Sellers | Resume 2020

Objective

Outgoing computer programmer with 4+ years of experience. Seeking to solve everyday issues with technology and expand my knowledge of computing. Demonstrated ability to bridge the communication barriers between stakeholders, customers, and developers.

Skill Summery

I am a computer programmer who works with Git, NodeJS, and AWS. In my free time I aspire to work on technology projects whether it's hardware or software. I am a leader who is willing to take all necessary action to make projects as successful as possible. Pushing team members and myself to learn and apply the skill needed to complete the task.

Primary Skills - JavaScript, NodeJS, Python, MongoDB, Shell Bash, GitHub, Web Design, Java

Applications/Platforms - Atom, Electron, AutoDesk, WordPress, GitHub, GitLab, PhotoShop, DaVinci Resolve, NodeJS, Linux, AWS, DarkFlow, Tensorflow, Gravit

Education

High School Education (2020), AP Computer Science (AP Exam - 5), AP Computer Science A Java (AP Exam - 5)

Experience / Projects

I have worked on many projects in the past, in various different languages and platforms. Building my own Linux Distribution and various applications on it, including the Relay Software Center, Application Launcher, PolarOS Notes, and Install system. I have built many projects using NodeJS like a bookmark manager or App store. Also, I have built various projects with Tensorflow, Darkflow, and Python like Weapon Detection and Mask Detection during the Covid-19 Pandemic (hype-industries.com). Additionally, I have hardware experience building 3D displays. From these experiences I have learned every stage of the development process and fully deployed applications for production.

Awards / Certifications

SoloLearn HTML - CERTIFICATION, SoloLearn CSS - CERTIFICATION, SoloLearn JavaScript - CERTIFICATION

Hobbies

In my free time I swim and that takes up most of my time. In the time that isn't taken by swimming, I work on computer projects. Programming applications and hardware that I think can change the world. I also publish and participate in many open source projects and work with a program to introduce elementary school students to programming.
